tuning your turbo starlet, we maxed out the standard turbo charger. The standard CT9 turbo runs out of puff at the 200bhp mark, however the standard engine is capable of pushing a touch more performance before the internals need changing to handle more power. Page 4/11

### **4efte Engine Tuning - chateiland.nl**

On the 4E-FTE engine the manifold is a particularly poor design in terms of tuning/flow. The ports on cylinders 2 and especially 3 are very restrictive and can result in engine failure if boost pressure is raised with this restriction in place! An easy and cheap way of removing this restriction is to grind out the restrictions down the ports.

Tuning Developments now offer a range of 4EFTE Forged Motor Packages to suit everyones needs, we have started with our Stage 1 Forged motor which is uprated in all the right places, keeping consideration to cost yet still being able to run a reliable 250bhp. For those that are looking to push more power than above we have our Stage 2 4EFTE Forged Engine that adds a few more well chosen parts to make a rock solid base for a big power setup, we then have our Stage 3 4EFTE Forged Engine which ...

## **Tuning Developments**

The 4EFTE engine was throttle-body fuel injected, had a displacement of 1,331 cc, and featured dual overhead camshafts. Ignition duty was handled by a distributor, and a Toyota-produced CT9 turbo provided the boost. An electrically controlled wastegate set the boost at either 5.8 psi or 9.4 psi, depending on the setting.

## **How to build a 5efte/4efte DIS - Paseo Performance Information**

The Toyota E engine family is a straight-four piston engine series, and uses timing belts rather than chains. The E engines were the first multi-valve engines from Toyota designed with economy, practicality and everyday use in mind (rather than performance). Like many other Toyota engines from the era, the E engine series features a cast iron block, along with an aluminium cylinder head.

I just watched my dad put back together a 4EFTE after a piston went out the side of the block just where it flares out to meet the sump (how I bought it). For starters the crank has 4ET stamped on it. Think. Had to shave 0.5mm of the conrod sections (not the mains). The conrod arms are twice as thick as (some early 4E engines) stock 4E.
