A-Level Computing Project Help - The Student Room

Hi, I am in Year 12 and I had no knowledge on Computer Science or Programming but know I am coding using python and pygame. For my A level project I thought of doing a revision game, e.g. simple game such as dodger(stuff falling and the user has to avoid them) or snake game(the snake eats and gets bigger) etc.

A* grade on the A level Computer Science Project - The ...

Grid computing projects. While distributed computing functions by dividing a complex problem among diverse and independent computer systems and then combine the result, grid computing works by utilizing a network of large pools of high-powered computing resources. These are typically "umbrella" projects that have a number of sub-projects underneath them, with multiple research areas.

List of distributed computing projects - Wikipedia

Sample Project Plan Describe the Major Phases of the Project. The plan needs to include all parts of the project, which are as follows. Conception and Initiation: This is a reiteration of the business case, where you described the idea behind the project and how it benefits the organization. You have already explored this and identified how it can be completed in your business case.

Sample Project Plan For Your Next Project

This would, for an A-level standard project, achieve a mark in Level Four for Documented Design (10-12 marks). If the problem selected was too simple to be of A-level standard but the same criteria had been fulfilled, shift the mark awarded down by two levels, into Level Two, an award of 4-6 marks.

the computing practical project - AQA

Level 4: Advanced Project. Leah Clark - An investigation into data collection techniques and deep learning to predict tennis matches. Deep learning is a technique in which a computing system known as a deep neural network (DNN) is fed large quantities of data which it can then use to make decisions about other data.
