Much more than just "eye exercises," vision therapy is a drug-free, effective, and evidence-based set of procedures. When performed under the supervision of a behavioral optometrist, vision therapy can correct and enhance the skills necessary for proper vision.

### College of Optometrists in Vision Development (COVD)

Vision Therapy helps individuals develop normal coordination and teamwork of the two eyes (binocular vision). When the two eyes fail to work together as an effective team, performance in many areas can suffer. Vision of both eyes aim simultaneously at the same visual target; vision wherein both eyes work together as a coordinated team.
