In the 9th hole, create an assembly just as you did in the 11th hole, only this time using a long belt and an 8mm REX shaft with a snap ring. Once you have the parts on the shaft, slide the shaft all of the way through until the snap-ring contacts the inner race of the bearing. Note: This assembly is very similar to the one created in steps 4-8.

The first few bags of the M40S kit are centered around the foundation of the chassis. The tub, front and rear bumpers, front and rear gearing, body posts, and suspension arms are what you'll focus on from the get-go. After these pieces have been assembled, you'll see the car take shape as all of those components are attached to the chassis tub.
