The transmission case has various codes including the casting code and the serial number. The serial number provides the date of manufacture, however, on 1969 and later transmissions there is a letter code at the end which identifies the gear-ratio, which is different on all three Muncie models. An example of the serial number is "P4D23B."

## **How to Identify Chevy 4 Speed Transmissions | It Still Runs**

Manual Transmission Identification: As mentioned above, modern 5-speed and 6-speed manual transmissions are easy to identify, but older 4-speed transmissions have more variety. While there are no distinctive pans and bolt counts to make transmission identification simple, 4-speed manual transmissions can be generally identified by examining the side profile.

### **GM Transmission Identification - Classic Industries**

4-SPEED TRANSMISSION I.D. CHART 5-SPEED TRANSMISSION I.D. CHART \*MUNCIE Shaft Identification: Muncie 4-speed transmissions can be distinguished by the form style of the transmission arm attachment. Pre-1969 Muncies use a stud and nut at the indicated attachment point, while 1969 and later Muncies use a bolt as illustrated on the right.

### **3-SPEED TRANSMISSION I.D. CHART 4-SPEED TRANSMISSION I.D ...**

Saginaw transmissions featured application codes on the passenger side of the case near the rear cover. "O" denoted the transmission was equipped with overdrive. "S" identified the three-speed transmission as manufactured in Saginaw, Michigan, from 1962 to 1979. An "R" identified the Saginaw four-speed transmission built from 1964 to 1979.

### **Saginaw Transmission Identification | It Still Runs**

My 1955 1st series GMC 1/2 ton 3-speed with torque tube has the following number on the transmission casting. C20G and 591615. Again I bought the truck in Elkhart Kansas in 1974, I assume it is the original transmission. I still have my Dad's 51 Chevy 1 ton panel truck but it is in terrible shape.
