What is micropigmentation? Micropigmentation, also known as permanent makeup, permanent cosmetics or cosmetic tattooing, is a cosmetic procedure used to improve or replace lost coloring on your skin. Micropigmentation is most often used on your face - to enhance eyebrows, eyelashes, eyelids (as eyeliner) and lips.

Micropigmentation (Permanent Makeup): How it's Done, Risks
Micropigmentation is used either as a cosmetic enhancement or as a corrective procedure for uneven skin pigmentation. It can also be used to improve the appearance of scarring to the skin or to reconstruct the nipple area. There are several drawbacks to permanent makeup that's designed to augment lips and eyes.

What is Micropigmentation? (with pictures)
Micropigmentation summarizes various types of treatments, but all have one thing in common: needles are used to apply color to the second skin layer. In this context, treatments for eyebrows, eyeliner and lips are called 'permanent makeup (PMU)'. However, the color entry is neither permanent for a lifetime nor a substitute for classic makeup.

Micropigmentation | Permanent Makeup (PMU)
Micropigmentation can be performed in an office setting. procedure will be performed with a pen-like instrument or standard tattoo gun. Your doctor or specialist will wear medical gloves when performing the procedure. The procedure itself will take a short amount of time, perhaps 20 minutes to a half hour at most.

Permanent Makeup (Micropigmentation): Get Facts About Risk
Micropigmentation, or permanent make up, is an innovative cosmetic procedure that enables both men and women to enhance the shape of their eyebrows, hairline, lips, eyes, and more, through the process of depositing pigment into the skin's dermal layer.

La técnica del microblading ha surgido en Asia como un método de micropigmentación para corregir o reconstruir la ceja o parte de ella cuando hay una falta de vello. A diferencia de otras antiguas técnicas de maquillaje, se dibuja el vello de una manera minuciosa, artística y natural. Además, se utilizan unas agujas muy finas: por ello, se obtiene un resultado tan realista.

Microblading: cejas antes y después - Mejor con Salud
Permanent makeup is a cosmetic technique which employs tattoos (permanent pigmentation of the dermis) as a means of producing designs that resemble makeup, such as eyelining and other permanent enhancing colors to the skin of the face, lips, and eyelids.It is also used to produce artificial eyebrows, particularly in people who have lost them as a consequence of old age, disease, such as ...
